

WNY debuts new school buses

The West New York Board of Education proudly debuts the district's two new school buses, which were purchased this past June and have been in use since school began this past September. The cost of the new 16 passenger bus was \$40,815, and the new 24 passengers cost \$51,984.

These buses are primarily used to transport special needs students throughout the district and to out-of-district placements.

Pictured above are the school community's professional bus drivers alongside the newest members of their bus fleet.
