April

WNY Middle School presents their 2010 Career Day

After the idea of our Career Fair was born, we ended up the school year with a very successful event directed to open up the minds of our students and allow them to experience the possibilities in the world outside the classroom. All this was possible thanks to the collaboration of the teachers, guidance counselors, administrators and of course thanks to the excellent disposition, professionalism and enthusiasm of our presenters.

West New York Middle School celebrated Career Day on April 13. Students learned first hand about career opportunities from a diverse group of individuals and companies. Like in the past, Career Day had professionals from different backgrounds to inspire our students. Among some of the occupations there will be a mechanical engineer, a dog trainer, a news reporter, a physical therapist, a video game developer, a fire fighter, a chef, a nurse, a political activist and a Radio City Music Hall Rockette.
